

# Willow Class

## Term 6 Newsletter

### Edible Garden!

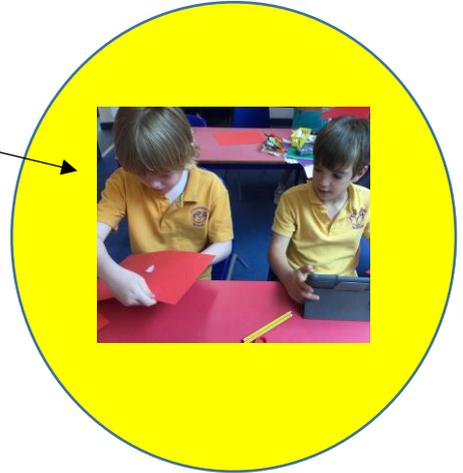

We will learn where and how a variety of ingredients are grown. We will learn how to cook with some basic ingredients; following recipes and using different kitchen equipment.

### Science

#### Forces, friction and magnetic attraction.

We worked scientifically and collaboratively to investigate friction, by exploring the movement of a toy car over different surfaces. We also had the opportunity to conduct an investigation into the strength of different types of magnet. We had fun using our understanding of magnetic attraction to design and create our own magnetic game.

**Swimming** has started and we will swim right up until the last day of term. All the children were very excited about getting on a coach. Our first lesson was like a class trip! Please contact the office if you are able to help. We leave school at 9am and return to school at 10.30am.

Our second PE lesson is on Thursdays. We are continuing our athletics unit and will then start practising for Sports Day!

### Science

During the last few weeks of term we are revisiting the 'plants' topic to consolidate our learning from term 4.

### Space Mission Maths

Congratulations to

The year twos (Finley Ward, Isaac S and Erin) for reaching Earth.

Ryley, Jake and William M for reaching Mars.

Isaac P and Charlie L for reaching Jupiter.

### English

As we approach the end of the academic year we are trying hard to bring together all that we have learnt and to demonstrate this in our final pieces of writing.

We are reading 'The Legend of Sally Jones' and using this story as a starting point to our lessons.

### Maths

Both year groups have just completed the unit of work on telling the time. Please take a look in book bags for worksheets to help practice at home. These do not need to be returned to school.

Please keep practising past tense verbs. (speaking and writing).
